

# WATER FROM THE WELL

Pretend you are a pioneer and that you can only use two gallons of water for all your daily needs. Pour your water into a plastic 8 oz. cup. This will help you figure out how much water you are using. Please write down what you used water for and how much you used each time you use it.

### Remember the Laws of the Land!

- You must use your own water to wash any plates, cups and forks you use.
- You may not use disposable items like paper towels, paper plates, or plastic utensils as a way to avoid washing your dishware. Remember, these items did not exist 150 years ago!
- You may eat food your family has prepared for you but wherever possible, you must add some of your water to the pot to represent your portion of water used for meals.
- Flushing the toilet is the one exception where you are allowed to use modern plumbing.

**WHAT DID YOU USE WATER FOR?**

**HOW MANY CUPS WERE USED?**

A large rectangular area with a decorative border featuring a repeating diamond and swirl pattern. Inside the border are horizontal lines for writing. In the center of the page, there is a faint, large illustration of a well with a bucket hanging from a pulley. At the bottom left and bottom right corners of the writing area, there are small illustrations of a frog.

Use other side if you need more room to write.

**TOTAL CUPS OF WATER USED IN ONE DAY:**
